SEC. 242.0395. REGISTRATION WITH TEXAS INFORMATION AND REFERRAL NETWORK.

(a) An institution licensed under this chapter shall register with the Texas Information and Referral Network under Section 531.0312, Government Code, to assist the state in identifying persons needing assistance if an area is evacuated because of a disaster or other emergency.

(b) The institution is not required to identify individual residents who may require assistance in an evacuation or to register individual residents with the Texas Information and Referral Network for evacuation assistance.

(c) The institution shall notify each resident and the resident’s next of kin or guardian regarding how to register for evacuation assistance with the Texas Information and Referral Network.

RULE §19.326 SAFETY OPERATIONS

(a) The facility must have a written emergency preparedness and response plan. Procedures to be followed in an internal or external disaster should be attached to the plan. The plan must address, at a minimum, the eight core functions of emergency management, which are: direction and control; warning (how the facility will be notified of emergencies and who they will notify); communication (with whom and by what mechanism); sheltering arrangements; evacuation (destinations, routes); transportation; health and medical needs; and resource management (supplies, staffing, emergency equipment, records). Plans should address those natural, technological, and man-made emergencies that could affect the facility and must be coordinated with the local emergency management coordinator. Information about the local emergency management coordinator may be obtained from the office of the local mayor or county judge.

(1) The facility must maintain the plan and procedures at the nurses station and with department managers within the facility. The facility must ensure that the plan and procedures are reviewed at least annually. Changes in administrator, construction, or emergency phone numbers will require the facility to review and possibly modify the disaster plan. All reviews of disaster plans must be documented.

(2) The facility must include in the disaster plan, evacuation routes and procedures to be followed in the event of fire, explosion, or other disaster. The plan must also include procedures for the prompt transfer of casualties, clinical records, medications, and notification of appropriate persons.
(3) All employees must be familiar with the disaster plan and must be instructed in the location and use of the facility's alarm systems, fire-fighting equipment, and procedures. The facility must post fire and explosion evacuation routes prominently throughout the facility. The facility must have a fire safety plan within the disaster plan. The fire safety plan must be rehearsed quarterly on each shift with at least one rehearsal conducted each month. A comprehensive fire drill report form must be completed for each rehearsal of the fire safety plan.

(4) In smaller, simple, one story buildings where all exits are obvious, the Texas Department of Human Services (DHS) may not require the posting of evacuation routes.

(5) The facility must have an emergency contingency plan to ensure the residents' comfort and safety, including the provision of potable water.

(6) Emergency telephone numbers must be clearly posted on or near each phone. Emergency telephone numbers must include the local fire department, ambulance, and police.

(b) The facility must report all fires to DHS on the Fire Report for Long Term Care Facilities Form within 15 days after the fire. The facility must immediately notify DHS by phone of disasters or any fires which caused death or serious injury. Telephone reports must be followed by written reports. Failure of the fire alarm,

(c) Severe weather drills and other emergency drills must be held as needed and as called for by the facility’s policy and procedure manual.

(d) The fire alarm and sprinkler systems must be inspected and tested at least once every three months by a licensed agent. Each quarterly inspection and test must be of the complete system, including smoke dampers and individual sprinkler heads. A standard report form of the inspection must be completed by the agent and kept on file by the facility. The report must include the signature of the person making the inspection and the date of the inspection. The facility must maintain a current contract on file for the services of the inspecting company.

(e) The facility may, at its own discretion, make simple periodic tests of the basic fire alarm system, such as by activating a manual-pull station, particularly when conducting required fire drills. At any time the facility staff verifies or suspects some malfunction of the system, the condition must be immediately investigated and corrected.

RULE §19.1914 DISASTER AND EMERGENCY PREPAREDNESS

(a) The facility must have detailed written plans and procedures to meet all potential emergencies and disasters such as fire, severe weather, and missing residents.

(b) The facility must train all employees in emergency procedures when they begin to work in the facility, periodically review the procedures with existing staff, and carry out unannounced staff drills using those procedures.
