

He-P 803.24 Quality Improvement.

(a) The nursing home shall establish an interdisciplinary quality improvement committee which:

(1) Shall have a minimum of 3 members, including the medical director, an individual representing nursing and an individual representing administration;

(2) Shall meet at least quarterly to evaluate quality improvement activities; and

(3) Shall make recommendations to the administrator to improve the quality of care.

(b) The quality improvement committee shall be responsible for:

(1) Identifying whether actual or potential quality deficiencies are present that require action;

(2) Developing plans of action to correct the deficiencies identified in (1) above; and

(3) Monitoring the effect of the corrections to assure that they remediate the deficiencies identified in (1) above.
